

Another \$50/\$100

The *Bank Note Reporter* of February, 1980, has a lead article on "Where are These Territorial Errors?"

Whoever wrote that article may not have been familiar with the 1907 and 1930 published comments on a similar related error note. I enclose photocopies of those comments for you to use as you see fit.

Eric P. Newman

St. Louis, Mo

(Editor's Note: While this letter was received in early February, we held it until the whole story of the double denomination New Mexico errors could be told and illustrated.

(The articles referred to in Newman's letter are about a \$50/\$100 double denomination Brown Back on The Aetna National Bank of Kansas City, Mo., Charter No. 4251. Bank serial number is 72, Govt. SN, 330250; signed by R.W. Tureman, Pres., L.D. Cooper, Cashier. The articles relate that the companion \$100/\$50 note had been caught at the bank and sent back to the Treasury for destruction. No mention of the fate of the \$50/\$100 is made.

(Does anybody know the current location of this double denomination error?)
